► Swipe on the go

Processing cards from your mobile device gives you the freedom to pursue the sale wherever it may take you !!!

Swipe on the go comes to you

Point-of-sale (POS) retail is no longer confined to a brick and mortar environment. Merchants and service providers are increasingly venturing into the field to meet consumers' expectations, and they want to be able to collect payment on the spot. Fortunately, Bank of St. Vincent and the Grenadines (BOSVG) has kept pace by going mobile and opening up a new world of opportunity for business in St. Vincent and the Grenadines.

Benefits of the Swipe on the go

Increase sales opportunities

If you are not currently accepting card payments, you are missing out on additional revenue. It has been proven that credit and debit card customers spend more than those who pay with cash, so by accepting card, you will be increasing sales.

Major card brands accepted

We process Visa, Mastercard and American Express debit, credit and prepaid cards.

Safer than cash or cheques

Less cash on premises reduces the risk of losses due to error, robbery or fraud with cash or cheque

Speedy settlement

Proceeds for credit and debit card sales are credited to your account within 48 hours.

Efficiency

The Point of Sale terminals provides your sales total at the end of each business day. Hence, reducing the time spent on balancing cash.

Ongoing support

Post-installation, BOSVG provides a number of support services to help your business:

Staff training on the use of the POS terminals and on card acceptance best practices and fraudulent card detection.

On line access to view merchant accounts.

Availability of BOSVG Merchant Service representatives to answer questions or provide solutions on card processing.
